2010 Medicine Practicing Physician Assistant

A Physician Assistant (PA) is a professional who practices medicine in collaboration or under indirect supervision of a physician, depending on state laws. Physicians do not need to be on-site with PAs and collaboration or supervision often occurs via electronic means when consults are necessary.

Physician assistant - Wikipedia

Physician assistants, also known as PAs, practice medicine on teams with physicians, surgeons, and other healthcare workers. They examine, diagnose, and treat patients. Duties. Physician assistants typically do the following: Take or review patients' medical histories

Physician Assistants : Occupational Outlook Handbook: : U ...

Abstract While much is known about the prevalence of burnout among physicians and nurses, little is known about burnout in the physician assistant (PA) profession. Approximately 50 percent of physicians and 35 percent of nurses report symptoms of burnout. Burnout is linked to increased health care costs, medical errors, and poor patient outcomes.

Burnout and Job and Career Satisfaction in the Physician ...

Practicing without a license is the act of working without the licensure offered for that occupation, in a particular jurisdiction. Most activities that require licensure also have penalties for practicing without a valid, current license. In some jurisdictions, a license is offered but not required for some professions.

Practicing without a license - Wikipedia
