At some point a longer list will become a List of Great Mathematicians rather than a List of Greatest Mathematicians. I've expanded my original List of Thirty to an even Hundred, but you may prefer to reduce it to a Top Seventy, Top Sixty, Top Fifty, Top Forty or Top Thirty list, or even Top Twenty, Top Fifteen or Top Ten List.

Description. The problem in numerical integration is to approximate definite integrals of the form $\int f(x) dx$. Such integrals can be approximated, for example, by n-point Gaussian quadrature $\int_a^b f(x) dx \approx \sum_{i=1}^n w_i f(x_i)$, where w_i , x_i are the weights and points at which to evaluate the function $f(x)$. If the interval $[a, b]$ is subdivided, the Gauss evaluation points of the new subintervals never coincide ...

"The colour of the skin is in no way connected with strength of the mind or intellectual powers."-Benjamin Banneker The following names represent those famous black mathematicians who beat the odds against their discrimination and achieved excellence in the field of mathematics.

10 Famous Black Mathematicians and Their Contributions

The development of Australian science in pre-war era was dependent on the individual achievements of a few famous scientists. Several of the famous Australian scientists went abroad for better facilities, better payoffs and more recognition. Throughout the last two decades, this

situation has drastically changed.

En théorie des probabilités, la loi de Gauss-Kuzmin est une loi de probabilité discrète à support infini qui apparaît comme loi de probabilité asymptotique des coefficients dans le développement en fraction continue d'une variable aléatoire uniforme sur $]$, [[3]. Le nom provient de Carl Friedrich Gauss qui considéra cette loi en 1800 [4], et de Rodion Kuzmin qui donna une borne pour la ...

En mathématiques, plus précisément en algèbre linéaire, l'élimination de Gauss-Jordan, aussi appelée méthode du pivot de Gauss, nommée en hommage à Carl Friedrich Gauss et Wilhelm Jordan, est un algorithme pour déterminer les solutions d'un système d'équations linéaires, pour déterminer le rang d'une matrice ou pour calculer l'inverse d'une matrice (carrée) inversible.
