Asperger's syndrome is a neurobiological disorder considered to be part of the autism spectrum. The exact cause of the condition is unknown, although many experts believe there is a hereditary component. Asperger's syndrome can affect people of all races and socioeconomic backgrounds, although it is three to four times more common among men.

### **What are the Main Symptoms of Asperger's Syndrome in Adults?**

Diagnosis. Your child's doctor will look for signs of developmental delays at regular checkups. If your child shows any symptoms of autism spectrum disorder, you'll likely be referred to a specialist who treats children with autism spectrum disorder, such as a child psychiatrist or psychologist, pediatric neurologist, or developmental pediatrician, for an evaluation.
