### **Early South Indian Temple Architecture**

North Indian temple architecture, style of architecture produced throughout northern India and as far south as Bijapur district in northern Karnataka state, characterized by its distinctive shikhara, a superstructure, tower, or spire above the garbhagriha (“womb-room”), a small sanctuary housing ...

### **North Indian temple architecture | architectural style ...**

Hindu temple architecture as the main form of Hindu architecture has many varieties of style, though the basic nature of the Hindu temple remains the same, with the essential feature an inner sanctum, the garbha griha or womb-chamber, where the primary Murti or the image of a deity is housed in a simple bare cell. Around this chamber there are often other structures and buildings, in the ...

Dravidian architecture is an architectural idiom in Hindu temple architecture that emerged in the southern part of the Indian subcontinent or South India, reaching its final form by the sixteenth century. It consists primarily of Hindu temples where the dominating feature is the high gopura or gatehouse; large temples have several. Mentioned as one of three styles of temple building in the ...

Temple No. 17, at Sanchi is a small temple built about 400 A.D. and everything attempted earlier, is done much better here. The stones are smaller and laid out in regular neat rows; the roof has been separated so that the portico has a slightly less prominent height - the Sanctum-Sanctorum being the main house of the God.

Arch: Arch, in architecture and civil engineering, a curved member that is used to span an opening and to support loads from above. The arch formed the basis for the evolution of the vault. Arch construction depends essentially on the wedge. If a series of wedge-shaped blocks—i.e., ones in which the
