Engineering Materials Science

The Materials Science and Engineering (MSEG) Department at the University of Delaware is a world leader in research and education related to the design, synthesis, processing, and characterization of solid organic, inorganic, and hybrid materials. We offer a MS in Materials Science and a PhD in Materials Science, as well as undergraduate minors in materials science and nanoscale materials.

Materials Science and Engineering is the study of the structure—processing—properties relationships of engineering materials. Modern MSE encompasses a broad range of materials, from traditional metallurgy to biological materials, polymers, ceramics, semiconductors, composites, and optical and magnetic materials, as well as numerous nanotechnology materials.

Welcome to the Department of Materials Engineering at the Indian Institute of Science. While you could take a virtual tour by browsing through the links, we have put together a page for current and prospective students, and another on the mechanisms through which our Department interacts with industries.. Here are a few highlights for the year 2017:
