There are three output files specified, and for the first two, no -map options are set, so ffmpeg will select streams for these two files automatically.. out1.mkv is a Matroska container file and accepts video, audio and subtitle streams, so ffmpeg will try to select one of each type. For video, it will select stream 0 from B.mp4, which has the highest resolution among all the input video streams.

Needed to put you one little bit of remrak to say thank you yet again for all the precious opinions you have contributed in this article. This is certainly surprisingly generous of you to supply unhampered all most people might have sold for an electronic book to help make some dough on their own, particularly given that you might well have done it in case you desired.
