

International Of Cytology Volume 95

International Of Cytology Volume 95

Urinary tract cytology is a common diagnostic test used in the initial work up of bladder cancer. Since its inception as an utilizable diagnostic technique by Dr. Papanicolaou in 1945, urinary cytology has proven to be a cheap, easily obtained, and accurate method in the detection of high-grade urothelial carcinoma.

Predicted negative predictive value (NPV) (solid blue lines) and positive predictive value (PPV) (solid orange lines) with 95% CIs (dotted lines) based on sensitivity and specificity of the multigene GC test established in this study for Bethesda III and IV cytology thyroid nodules.

Performance of a Multigene Genomic Classifier in Thyroid ...

Germ cell tumors (GCTs) are classified as extragonadal if there is no evidence of a primary tumor in either the testes or the ovaries. Extragonadal GCTs typically arise in midline locations, and specific sites vary with age. In adults, the most common sites are the anterior mediastinum ...

Intracranial germ cell tumors - UpToDate

Zika virus, an arthropod-borne flavivirus pathogen in humans, is unusual because it can be sexually transmitted and can be shed for prolonged periods in semen. We report viral shedding in vaginal secretions for up to 6 months, indicating the potential for sexual and vertical transmission by infected women.

Prolonged Shedding of Zika Virus RNA in Vaginal Secretions ...

Tracheal intubation, usually simply referred to as intubation, is the placement of a flexible plastic tube into the trachea (windpipe) to maintain an open airway or to serve as a conduit through which to administer certain drugs. It is frequently performed in critically injured, ill, or anesthetized patients to facilitate ventilation of the lungs, including mechanical ventilation, and to ...

Tracheal intubation - Wikipedia

Metastases to the spine can involve the bone, epidural space, leptomeninges, and spinal cord. The spine is the third most common site for metastatic disease, following the lung and the liver. Approximately 60–70% of patients with systemic cancer will have spinal metastasis. Materials/Methods. This is a review of the imaging techniques and typical imaging appearances of spinal metastatic disease.

International Journal of Surgical Oncology - Hindawi

Staging. Two major classifications are currently being used. The Japanese classification is more elaborate and is based on anatomic involvement, particularly the lymph node stations. 12 The other staging system, developed jointly by the AJCC and the Union for International Cancer Control (UICC), is the system used in countries in the Western Hemisphere. 13 A minimum of 15 examined lymph nodes ...
