

Mammals Of Alabama

Mammals Of Alabama

List of mammals of Alabama. There are six known introduced mammal species in the state. These include the black rat, brown rat, fallow deer, feral swine, house mouse, and nutria. Several other mammal species have had verifiable sightings within the state, but are believed by biologists to be without established breeding populations.

List of mammals of Alabama - Wikipedia

Mammals of Alabama. The diversity of Alabama spans common mammals, such as opossums and hispid cotton rats, and some of the rarest species in North America, such as the Perdido Key Beach Mouse. Six species are exotics that have been introduced to the state, and four mammal species are now no longer found in the state.

Mammals of Alabama | Encyclopedia of Alabama

Mammals. Alabama is home to 62 native mammals, including 22 species of rodents, 16 species of bats, 11 species of carnivores, six species of insectivores, four species of rabbits, one ungulate, one opossum and one armadillo. In addition, there are six exotic (non-native) species that have been introduced in Alabama - the black rat, Norway rat,...

Mammals | Outdoor Alabama

Beautifully designed and sturdily bound for rugged field use, Mammals of Alabama is the first and only exhaustive guidebook to Alabama's diverse and fascinating mammalian fauna. European and American naturalists visited the territory that would become Alabama as early as the late eighteenth century and marveled at the breadth and variety of its flora and fauna.

Mammals of Alabama (Gosse Nature Guides) First Edition

Mammals of Alabama fills the gap. Naturally occurring in the state are nine orders, twenty-two families, fifty-one genera, and seventy-two species of living mammals. Best and Dusi offer an engaging entry for each as well as additional species that have become extinct through natural processes or human extirpation.
