Remote Observatories For Amateur Astronomers

Amateur astronomy is a hobby where participants enjoy observing or imaging celestial objects in the sky using the unaided eye, binoculars, or telescopes. Even though scientific research may not be their primary goal, some amateur astronomers make contributions in doing citizen science, such as by monitoring variable stars, double stars sunspots, or occultations of stars by the Moon or asteroids ...

PlaneWave Instruments was founded in 2006 by Richard Hedrick and Joseph Haberman, two former telescope engineers at Celestron. Getting a product like the CDK into the hands of serious imagers and amateur astronomers has been a shared vision of Hedrick and Haberman for many years.

The first eight Sierra Remote Observatories were built in 2007. The project was founded by Dr. Greg Morgan, Dr. Keith Quattrocchi, and Dr. Mel Helm, all of whom are members of the Central Valley Astronomers. The observatories are at a dark site at 4610' altitude, near Shaver Lake.

Astronomy Research Opportunities for Fresno State Students

My first dedicated observatory, the MAS Observatory, was built in 2003 in Greene, Maine. The new observatory, The Lost Valley observatory, is located at Sierra Remote Observatories (SRO), a group of observatories in the Sierra Nevada Mountains.

The Lost Valley Observatory

Astronomy (from Greek: ἀστρονομία) is a natural science that studies celestial objects and phenomena. It applies mathematics, physics, and chemistry in an effort to explain the origin of those objects and phenomena and their evolution. Objects of interest include planets, moons, stars, nebulae, galaxies, and comets; the phenomena also includes supernova explosions, gamma ray bursts ...

This chart is centered on a site along Hualapai Mtn Road, near a picnic area. It is used for star parties by the High Desert Astronomy Club. Forecast covers the Hualapai Mountain County Park.: Hualapai Valley Observatory

Clear Sky Charts in Arizona (List)

The All Sky Cam has been discontinued as of October 2015. Dealers may still have stock of cameras and accessories, so you may still be able to purchase cameras and accessories for a short time.

Moonglow Technologies - All Sky Cam

Astronomical Society has formed a working group to foster partnering between professional and amateur astronomers. Many amateurs freely share their excitement about science with local teachers and students through such programs as Project ASTRO, which links astronomers with 4th through 9th grade teachers and classes in 10 sites around the country.
