Abstract and Applied Analysis is a mathematical journal devoted exclusively to the publication of high-quality research papers in the fields of abstract and applied analysis. Emphasis is placed on important developments in classical analysis, linear and nonlinear functional analysis, ordinary and partial differential equations, optimization theory, and control theory.

Abstract and Applied Analysis— An Open Access Journal

L'analyse est une branche des mathématiques comprenant l'étude des fonctions d'une ou plusieurs variables, mais aussi des suites et séries, de leur limite éventuelle et plus généralement des systèmes dynamiques. Trouvant ses origines d'une part dans certaines méthodes de calcul pour des mesures géométriques, d'autre part dans l'approximation et la comparaison de grandeurs ...

Communications Faculty of Sciences University of Ankara Series A1-Mathematics and Statistics is a single-blind peer reviewed fully open access journal which has been published since 1948 by Ankara University, accepts original research articles written in English in the fields of Mathematics and Statistics. Review articles written by eminent scientists can also be invited by the Editor.

In queueing theory, a discipline within the mathematical theory of probability, the M/M/c queue (or Erlang-C model: 495) is a multi-server queueing model. In Kendall's notation it describes a system where arrivals form a single queue and are governed by a Poisson process, there are c servers and job service times are exponentially distributed. It is a generalisation of the M/M/1 queue which ...
